

I am an over the road truck driver. I travel to many major cities. XM radio has not only made my trips more safe by me not having to keep looking for a radio station that broadcasts the traffic and the weather while driving in traffic but also helps me to instantly plan my trip while in motion to prevent me and my big truck from becoming part of the problem in traffic tie ups.

NAB's petition 04-160 is the worst idea I have heard and I ask for you to reject it on behalf of all the truck drivers out there.

I mean, how would you like me behind you in stop and go traffic with me constantly messing with local radio stations.....

Sincerely,

Mikel Connor
